- (b) 30-39
- (c) 40-49
- (d) 50-59
- (e) 60-70+

Age groups are determined by the participant's age at the date of the event. In addition, the age groups are classified based on the average age of the two DOUBLES participants at the time of the event. E.g. Doubles Team Member 1 is 24 years old and Doubles Team Member 2 is 38, the average age is 31, hence they will be classified into age group (b).

3.3 Ranking System

Our ranking system and the resulting overall ranking is based on the fastest time in the respective division of each event. Results are displayed from the fastest to the slowest time. In addition, there will be a ranking within the age groups; also displayed from the fastest to the slowest time.

The results will be published immediately after the event ends available at HYROX DOUBLES.com. Penalties, etc. may be added up to 48 hours after the event ends.

Any incomplete running laps, improperly executed repetition or deviation from the prescribed standard of movements is considered invalid and results in a penalty (see Penalties).

3.4 Qualification for the HYROX WORLD CHAMPIONSHIPS

The highlight of every HYROX season are the WORLD CHAMPIONSHIPS. Any HYROX DOUBLES participants starting at a regular HYROX event can qualify for the HYROX WORLD CHAMPIONSHIPS. However, the qualification spots are limited to a certain number for each division. The exact amount of spots per division will be announced in the Athlete's Guide of each event city. If a HYROX DOUBLES team placed within their age group and earned a designated spot, the team will be notified via Email the day after the event. The team then has exactly 48 hours to confirm their reservation for the WORLD CHAMPIONSHIPS, otherwise their spot will be forwarded to the next best placed doubles participants to reserve.

If a DOUBLES Team Member drops out, he/she can be replaced. The only requirement is, that the new DOUBLES team member has to be the same gender and age as the dropped out member. This way the age group, and division remain the same age. (see Point 3.2).

Participants who have qualified for both categories, as an individual and as a DOUBLE, must choose one category as they cannot participate in both categories at the championship.

The organizer reserves the right to hand out wildcards and invite athletes to the WORLD CHAMPIONSHIPS.

4. THE COMPETITION

4.1 HYROX DOUBLES composition

HYROX DOUBLES is a 2-person-team competition. The DOUBLES Team can consist of 2 male athletes, 2 female athletes or 1 female and 1 male athlete.

The competitions consists of a 1 km run followed by one workout, repeated 8 times. In order to complete the entire HYROX DOUBLES Race and receive a valid finishing time, the participants must complete the runs and work-outs in the designated order (run, workout, run, workout, etc) until they have completed a total of 8k running and 8 workouts.

While the running distance of 8x 1km must be completed by each DOUBLES Member, the workouts can be completed in a combined effort.

4.2 Workout Stations

The 8 workouts must be completed together. However, it is up to each DOUBLES Team Member (DTM) how far in distance or how many reps he/she completes. The HYROX DOUBLES competition follows the principle „YGIG“ (YOU GO I GO) which means, DTM 1 works, while DTM 2 rest and vice versa. Therefore only one of the DTM's is allowed to be active. Rest times, can be taken as needed - concurrently as well.

The workout-station is completed when the entire distance or repetitions are covered.

YGIG Example 1000m Row:

DTM 1 starts rowing while DTM 2 waits.

After a self-selected distance (for example 250m) DTM 1 stops rowing and DTM 2 continues to row. Now DTM 1 rests, and so on.

This process is repeated until the entire distance of 1000m is covered.

4.3 Workout Rules and Regulations

- Complete all workouts, in the correct order
- Perform each exercise according to the movement standards
- Use the correct start & finish points of each workout-station
- Complete the required number of repetitions and/or distance
- Perform the exercises/movements with the correct weights

4.4 Running

The DMs must run together at all times for the entire distance of 1000m between the workout-stations. If one DTM runs at a faster pace, this will lead to 3 Minute penalty as this disturbs the time tracking system.

Important: Once the running distance is completed both DTM's must enter the workout station together. Both DTM's have to be present in order to start with the exercises. The workout station can only be exited after the entire distance or the repetitions are covered, and must be exited by both DTM's at the same time.

The running distance is always 1000m. Depending on the venue size, the run might be spread out into 2-3 laps. In some cases, due to a staggered starting zone, the running laps might be shorter than 1000m, in this case the missing meters will be balanced out during the last running laps (right before the Wall Ball station).

On the running track there is a dividing line. This divides the track into two speed areas: left lane = fast lane, and right lane = regular speed. Faster athletes should keep left and slower athletes right.

4.5 Referees and Headjudges

For each workout, a referee will be responsible for ensuring all participants complete the workout in the correct and safe manner. The referee does this

in coordination with the head judge of the workout-station. The head judge of each station is overseen by the Race Director who oversees all sporting aspects of the competition and holds final say on all judging matters.

All decisions of the referee, head judge, race director, and event organizers are final.
